

# CoolFreeze TM-850VAN

# CoolFreeze TM-850VAN

- 850 litre compressor cool container
- Features
- Powerful cooling capacity through Danfoss compressor and air circulation system
- Digital temperature display to set temperature in the range of 0-12 degrees
- TUV GS and E1 certificated
- ATP certificated
- H.A.C.C.P approved
- Crash tested according to ECE R80  
74/408/EWG

# CoolFreeze TM-850VAN

The main characteristics of the refrigerator are:

- Fitting and dismantling in a very short time without any tools
- Fast and safe fixation in the car by means of the provided belt set
- Due to the integrated reloadable battery the unit can be operated during 8 hours without any power supply (at 25 degrees ambient with precooled load)
- The inside volume of 850L can be individually arranged with the wire shelves
- The robust cabinet made of PE is nearly insensitive against external damages
- Best temperature distribution with air circulation system and low energy consumption thanks to optional isolation
- Precise and individually adjustable set point temperature
- An optical temperature alarm system reports any deviation of the preset temperature set-point
- Double magnet sealing system of the door
- Optimal inside illumination with powerful Multi-LED-system
- High product safety thanks to door lock which can be opened from inside

## Technical data AC8500

### - Outside Dimensions:

Height x Width x Depth (mm)

1000 x 1100 x 1400

### - Gross Capacity:

850 Litre

### - Voltage:

AC: 220-240V 50-60Hz

### - Power:

150 Watt - 12V DC

220 Watt - 240V AC

360 Watt max. with battery charger

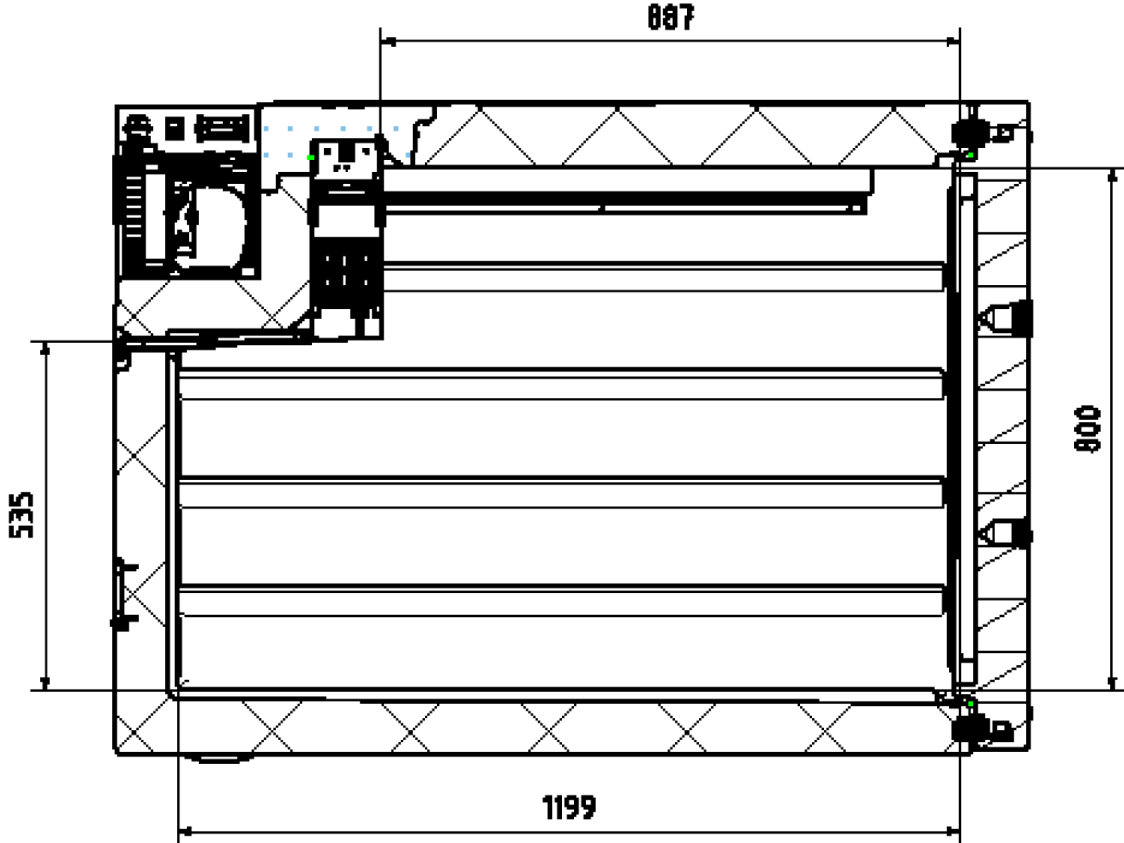

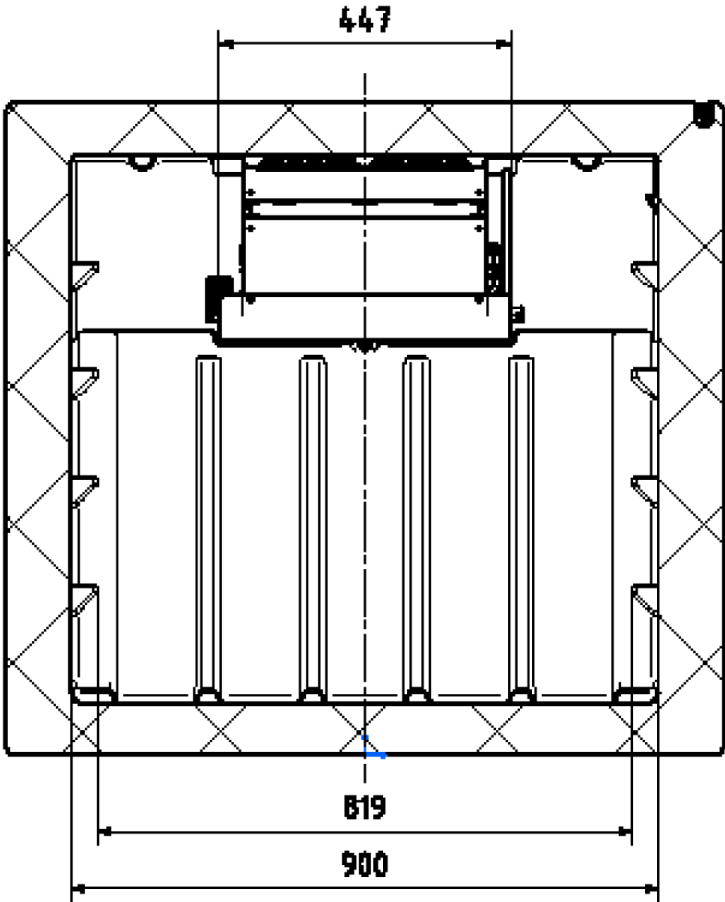

### - Temp. Class

SN/T (43 Degrees)
