

# TM-100 RT SERIES

## REFRIGERATION TRANSPORT SYSTEM

TM-100 RT Series by Thermal Mark is designed for chilled and frozen applications on small to medium sized vans.

The compressor is driven by the truck engine. Integrated 240v electric standby model available upon request, (OED) Off Engine Drive supplied as standard.

## FEATURES & BENEFITS

- » **Optimum Performance**  
for superior cooling & less fuel consumption
- » **High Capacity & Airflow**  
to ensure even temperature distribution
- » **Exceptional Pull-Down**  
Capacity after regular door openings
- » **Low Operating Noise**  
allowing unrestricted deliveries in residential areas
- » **Intelligent & User Friendly**  
control system with digital in-cab display
- » **Electric Standby**  
240v
- » **Affordable Reliability**  
knowing your unit will have a long life cycle at a small cost
